Description of Internship Provider:

Facilities Operations & Building Services—Utilities and Energy Management

Description of Internship Position:

Reporting to the Director of Utilities & Energy, the Utilities & Energy Management Energy and Water Conservation Intern shall receive training in and support the professional and technical leadership conservation strategies, day-to-day oversight of an on-going energy and water conservation program, field oversight, and coordination of Energy Services Performance Contracting projects and providers. The Utilities & Energy Management Energy and Water Conservation Intern will be trained in and support high level technical assessments in support of the development and implementation of strategic initiatives and long-range plans for energy conservation projects and services. This position will develop expertise and advanced technical knowledge of energy and water, the ability to perform technical feasibility studies and assessments, manage projects and financial planning designed to deliver new monitoring and conservation programs and capital improvement projects to meet the needs of the University community.
